

Matter Bridge

The Matter Bridge enables control of any IoT device from your Matter platform, extending Matter to rich device ecosystems with unified control for a plug-and-play smart home solution.

Zigbee to Matter Connectivity

The Matter Bridge Middleware provides a seamless user experience by controlling Matter and Zigbee devices through a single Matter interface. Users can effortlessly link Zigbee ecosystem with the Matter protocol.

Features

- Zigbee | Matter protocols compliant
- Cross-platform: tailor hardware to your specific use case
- HW interfaces: Wi-Fi for Matter and 802.15.4 for Zigbee connectivity
- Works with any Matter controller
- Mobile application for commissioning
- Support group commands and scenes for complex controls
- Zigbee Coordinator role to reconnect existing devices
- Convenient Wi-Fi provisioning
- Portable to DSR White Label Gateway or Client platform

MATTER BRIDGE MIDDLEWARE

Benefits

- Zigbee to Matter Connectivity
- Unified Interface Experience
- IoT Interoperability
- Platform Flexibility
- Standardized Approach
- Seamless integration of Zigbee devices
- More compatible devices without new product lines
