

Gateway Solutions from DSR

DSR's Gateway solutions are central hubs: managing your IoT devices & connecting them to each other, the cloud or other backends.

Out-of-the-Box Connection

Gateway 360 is an out of the box gateway solution from DSR. It is compatible with all Zigbee Certified devices and follows the latest standards and protocols. DSR's Gateway 360 is a secure and reliable solution.

Benefits

Gateway 360 is designed to support a wide range of devices. The local rules engines can even operate without internet connection. DSR's offering also provides remote updates and diagnostic support. Seamlessly integrate the Gateway 360 with 3rd-Party backends through Gateway Manager Layer.

Features

- Works with 3rd party clouds through integration layer.
- Plug & Play with CSA certified devices
- Multiprotocol approach: ZB, Matter, WiFi and BLE connectivity upon customer demand
- Firmware upgrade server in package
- Self-diagnostic module
- IoT Engines and local rules run without internet connection
- White label IOT framework including cloud and commissioning apps
- API for local applications onboard (available for 360 model)
