

Gateway Middleware from DSR

DSR's Gateway Middleware turns any device into a central hub: easily managing your IoT devices & connecting them to each other, the cloud or other backends.

Independent & Portable

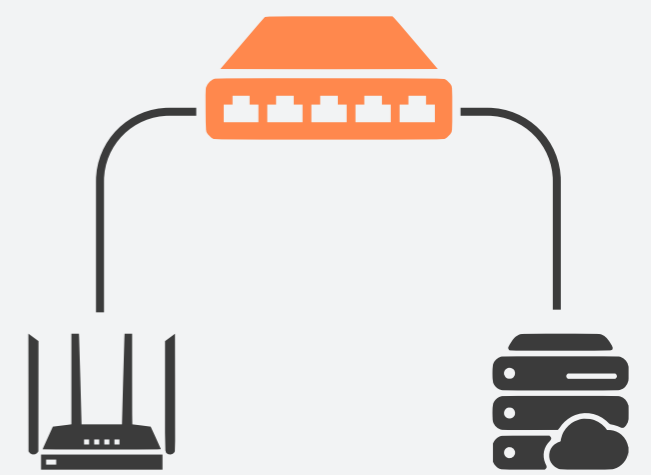

DSR's Gateway Middleware is a hardware independent solution which can be integrated with multiple types of devices. Our single-code approach helps to save on the development and support costs.

Benefits

DSR's Gateway Middleware solution has loads of functionality and flexibility. DSR can port middleware onto a range of devices. Local rules engine can be configured to customer's request and DSR provides diagnostic support.

Features

- Single-code Gateway Middleware which runs on different platforms – WiFi router, Smart Speaker, STB or any other device
- Plug & Play with CSA certified devices
- Multiprotocol approach: ZB, Matter, WiFi and BLE connectivity upon customer demand
- Easy integration with any cloud through special integration layer
- Firmware upgrade server in package
- Self-diagnostic module
- Local rules engine runs without internet connection
- White label IOT framework including cloud and commissioning apps
