

GreenBOSS from DSR

DSR's GreenBOSS, is now available to members of the ZBOSS Open Initiative. GreenBOSS supports the new Zigbee Green Power feature, from the Connectivity Standards Alliance.

Zigbee Green Power

Zigbee Green Power is a feature of Zigbee that supports battery-less and battery powered devices with low capacity. Zigbee Green Power makes solutions more sustainable, by integrating green, energy-harvesting devices into the Zigbee Network.

GreenBOSS

GreenBOSS will help your company meet sustainability goals by providing the tools to build Zigbee Green Power IoT devices with optimized power consumption. GreenBOSS is available to members of the ZBOSS Open Initiative

Features

- Support for power-limited devices on MCU
- Optimized power consumption for battery-less or battery powered devices
- Unidirectional and bidirectional commissioning
- Hardware-independent
- Cross-platform: OS layer for minimum effort porting
- OS-less configuration
- Fixed memory footprint
- Optimized memory usage: low RAM capacity on targeted device
- Easy-to-use API
